Churchill Diamond Corporation

(An Exploration Stage Company)

FINANCIAL STATEMENTS

FOR THE YEAR ENDED AUGUST 31, 2018

(Expressed in Canadian Dollars)

NOTICE OF NO AUDITOR REVIEW OF FINANCIAL STATEMENTS

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of financial statements by an entity's auditor.

The accompanying financial statements of Churchill Diamond Corporation for the year ended August 31, 2018 have been prepared by the management of the Company and approved by the Company's Board of Directors.

The accompanying financial statements of the Company have been prepared by and are the responsibility of the Company's management.

Churchill Diamond Corporation

1. NATURE AND CONTINUANCE OF OPERATIONS

Churchill Diamond Corporation (referred to as the "Company" or "Churchill"), is a Canadian exploration stage mining company which is focused on the exploration of minerals and precious gems in Canada's Nunavut Territory and Ontario.

The Company was incorporated on April 10, 2014, under the *Canada Business Corporations Act*. Its registered office is located at Suite 501, 133 Richmond Street West, Toronto, Ontario, M5H 2L3. The Company's records office is located at 2100 Scotia Plaza, 40 King Street West, Toronto, Ontario, M5H 3C2.

At the date of these financial statements, the Company has not identified a known body of commercial grade minerals on any of its properties. The ability of the Company to realize the costs it has incurred to date on these properties is dependent upon the Company identifying a commercial mineral body, to finance its development costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the property. To date, the Company has not earned any revenues and is considered to be in the exploration stage.

These financial statements have been prepared assuming the Company will continue on a going concern basis. The Company has incurred losses since its inception and the ability of the Company to continue as a going concern depends upon its ability to raise adequate financing and to develop profitable operations. As at August 31, 2018, the Company had working capital deficiency of $106,081 and an accumulated deficit of $1,504,560. These conditions may cast substantial doubt regarding the Company's ability to continue as a going concern. These financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

Management is actively targeting sources of additional financing through alliances with financial, exploration and mining entities, and other business and financial transactions which would assure continuation of the Company's operations and exploration programs. In addition, management closely monitors commodity prices of precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company if favorable or adverse market conditions occur.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION

Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

Basis of preparation

These financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The accounting policies set out below have been applied consistently to all years presented in these financial statements.

Critical accounting estimates

The information about significant areas of estimation uncertainly considered by management in preparing the financial statements are as follows:

Carrying value and recoverability of exploration and evaluation assets

The carrying amount of Company's exploration and evaluation assets does not necessarily represent present or future values, and the Company's exploration and evaluation assets have been accounted for under the assumption that the carrying amount will be recoverable. Recoverability is dependent on various factors, including the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to commence and complete development and upon future profitable production or proceeds from the disposition of the mineral properties themselves. Additionally, there are numerous geological, economic, environmental and regulatory factors and uncertainties that could impact management's assessment as to the overall viability of its properties or to the ability to generate future cash flows necessary to cover or exceed the carrying value of the Company's exploration and evaluation assets.

To the extent that any of management's assumptions change, there could be a significant impact on the Company's future financial position, operating results and cash flows.

Income taxes

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION (CONTINUED)

Critical accounting judgments

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments.

The preparation of these financial statements requires management to make judgments regarding the going concern of the Company as discussed in Note 1.

Share-based payments

The Company grants stock options to buy common shares of the Company to directors, officers, employees and consultants. The Company recognizes share-based payments expense based on the estimated fair value of the options. A fair value measurement is made for each vesting installment within each option grant and is determined using the Black-Scholes option-pricing model. The fair value of the options is recognized over the vesting period of the options granted as both share-based payments and stock option reserve. This includes a forfeiture estimate, which is revised for actual forfeitures in subsequent periods. The reserves account is subsequently reduced if the options are exercised and the amount initially recorded is then credited to share capital.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

Income taxes

Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in shareholders' equity, in which case it is recognized in shareholders' equity. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous periods.

Deferred tax is recorded by providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes; the initial recognition of assets or liabilities that affect neither accounting or taxable loss; nor differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position date.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION (CONTINUED)

Income taxes (continued)

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Additional income taxes that arise from the distribution of dividends are recognized at the same time as the liability to pay the related dividend. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Exploration and evaluation assets

Upon acquiring the legal right to explore a mineral property, all direct costs related to the acquisition of exploration and evaluation assets are capitalized. Exploration and evaluation expenditures incurred prior to the determination of the feasibility of mining operations and a decision to proceed with development, are charged to profit or loss as incurred.

Exploration costs are expensed as incurred as the Company is in the process of exploring its exploration and evaluation assets and has not yet determined whether these properties contain ore reserves that are economically recoverable. If and when the Company's management determines that economically extractable proven or probable mineral reserves have been established, the subsequent costs incurred to develop such property, including costs to further delineate the ore body, will be capitalized.

At each reporting date the carrying amounts of the Company's exploration and evaluation assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION (CONTINUED)

Provision for environmental rehabilitation

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-lived assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The rehabilitation asset is depreciated on the same basis as the related asset.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related asset with a corresponding entry to the rehabilitation provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates.

Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit and loss for the year.

For the years presented the Company has no provisions for environmental rehabilitation.

Foreign exchange

The functional currency is the currency of the primary economic environment in which the entity operates. The functional currency for the Company is the Canadian dollar.

Foreign currency transactions are translated into the Canadian dollar using the exchange rates prevailing at the dates of the transactions. At the end of the each reporting period, the monetary assets and liabilities of the Company that are denominated in foreign amounts are translated at the rate of exchange at the statement of financial position date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

Loss per share

The Company presents basic loss per share for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION (CONTINUED)

Financial instruments

Financial assets

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or assets acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in profit or loss.

Loans and receivables - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default.

Held-to-maturity investments - These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in profit or loss.

Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in equity. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognized in profit or loss.

All financial assets except for those at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

Financial liabilities

The Company classifies its financial liabilities into one of two categories, depending on the purpose for which the liability was acquired. The Company's accounting policy for each category is as follows:

Fair value through profit or loss - This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing it in the near term. They are carried in the statement of financial position at fair value with changes in fair value recognized in profit or loss.

Other financial liabilities: This category consists of liabilities carried at amortized cost using the effective interest rate method.

See Note 12 for relevant disclosures.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION (CONTINUED)

Impairment of long-lived assets

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Flow-through Shares

Under Canadian income tax legislation, a company is permitted to issue flow-through shares whereby it agrees to incur qualifying expenditures and renounce the related income tax deductions to the investors. The proceeds from issuance of these shares are allocated between the offering of shares and the sale of tax benefits. The allocation is made based on the difference between the quoted price of the existing shares and the amount the investor pays for the flow-through shares. A flow-through share premium liability is recognized for this difference. The Company renounces the deductions for tax purposes related to the eligible exploration and evaluation expenditures on the date the flow-through shares are issued under the look-back rule.

The flow-through share premium liability is reduced on a pro-rata basis and recorded in profit or loss based on the corresponding eligible expenditures that have been incurred.

Equipment

Equipment is initially recognized at cost which includes the purchase price, and directly attributable costs for bringing the asset to the present location and condition necessary for its intended use, and the estimated present value of any future costs of dismantling and removing items. All items of equipment are subsequently carried at cost less accumulated depreciation and accumulated impairment losses, if any.

Depreciation is provided for at the following rate:

- Computer equipment 30%

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset as appropriate, only when it's probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to profit or loss during the year in which they are incurred.

(Expressed in Canadian Dollars)

3. ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

New standards and interpretations not yet adopted

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for accounting periods beginning on or after January 1, 2018. Updates which are not applicable or are not consequential to the Company have been excluded thereof. The following have not yet been adopted by the Company and are being evaluated to determine their impact.

- IFRS 9 – New standard that replaced IAS 39 for classification and measurement, effective for annual periods beginning on or after January 1, 2018. The Company has performed a preliminary analysis and expects no material impact from adopting this standard.

- IFRS 15 - New standard to establish principles for reporting the nature, amount, timing, and uncertainty of revenue and cash flows arising from an entity's contracts with customers, effective for annual periods beginning on or after January 1, 2018. The Company has performed a preliminary analysis and expects no material impact from adopting this standard.

- IFRS 16 – Leases: New standard to establish principles for recognition, measurement, presentation and disclosure of leases with an impact on lessee accounting, effective for annual periods beginning on or after January 1, 2019. The Company is currently evaluating the impact of this standard.

Travel	**2,713**	38,313	**54,441**
Balance, end of year	**$ 94,829**	$ 746,107	**$ 1,130,949**

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many exploration and evaluation assets. The Company has investigated title to all of its exploration and evaluation assets, and, to the best of its knowledge, title to all of its properties, are properly registered and in good standing.

a) Pelly Bay Property, Nunavut

The Pelly Bay Property is located in central Nunavut, Canada. The Company has a 100% interest in all claims of the Pelly Bay Property.

Adamera, the original optionor, will retain a 2% Gross Over-riding Royalty ("GOR") on all diamonds mined in a specific Area of Interest, of which 1% can be purchased by the Company not later than within the first year of production, for $1,000,000. Adamera also retains a 2% GOR on all other commodities mined in the Area of Interest, under the same terms.

The Pelly Bay Property will require $1,707,500 in qualified work expenditures, or cash fees, to keep all claims in good standing to July 24, 2019. Work or charges for each year from July 24, 2019 to July 24, 2024, due on these dates, is $853,750 per year, assuming the entire property is retained. The Company had applied for a further extension for one year to the Nunavut Mining Recorder and is awaiting the decision. The Company is also in discussions with Adamera about revising terms.

5. EXPLORATION AND EVALUATION ASSETS (CONTINUED)

b) ***Eric Lake Property, Northern Ontario***

On August 23, 2016, the Company entered into an earn-in agreement with Rudolf Wahl and Frederick Lowndes (collectively, the “Vendors”) on the Eric Lake property (“Eric Lake”).

During the year ended August 31 2017, the Company decided not to continue exploration of the Eric Lake Property and returned the property to the vendor on August 21, 2017; as a result, the Company wrote off the capitalized costs of $47,500 associated with the Eric Lake Property during the year ended August 31, 2017.

c) ***Sandspit Lake Property, Northern Ontario***

On August 23, 2016, the Company entered into an earn-in agreement with Rudolf Wahl and Frederick Lowndes (collectively, the “Vendors”) on the Sandspit Lake property (“Sandspit Lake”). Sandspit Lake originally consisted of one isolated claim that required $5,103 work annually. The Company has increased the size of the property by staking 19 new claims.

Pursuant to the agreement, the Company can acquire up to a 100% interest in Sandspit Lake by making the following payments:

- On August 23, 2106: $10,000 cash (paid) and 150,000 shares (issued; fair value of $37,500)
- On August 23, 2017: $15,000 cash (paid) and 100,000 shares (issued; fair value of $25,000)
- On August 23, 2018: $15,000 cash (deferred) and 100,000 shares (issued; fair value of $25,000)
- On August 31, 2019: $50,000 cash and 300,000 shares

During the year ended August 31, 2018, the Company entered into agreement with the Vendors to defer the cash payment requirement indefinitely.

The Vendors will retain a 3% GOR on all diamonds minded in Sandspit Lake, of which 2% can be purchased by the Company at any time for $2,000,000. The Vendors will also retain a 3% GOR on all other commodities mined at Sandspit Lake, with the same royalty terms. The Company incurred qualified exploration expenditures of $219,552 on the Sandspit Lake Property, such that all claims are in good standing.

5. EXPLORATION AND EVALUATION ASSETS (CONTINUED)

d) White River Property, Northern Ontario

On February 9, 2017, the Company entered into an earn-in agreement with the Vendors) on the White River property ("White River"). The original property totaled 12 mining claims which the Company has increased to 72 claims through staking programs.

Pursuant to the agreement, the Company can acquire up to a 100% interest in White River by making the following payments:

- Upon signing the agreement: $40,000 cash (paid)
- Upon regulatory approval: 350,000 common shares (issued; fair value of $87,500)
- On or before February 9, 2018: $30,000 cash (paid) and 500,000 common shares (issued; fair value of $125,000)
- On or before February 9, 2019: $30,000 cash and 500,000 common shares
- On or before February 9, 2020: $30,000 cash and 500,000 common shares
- On or before February 9, 2021: $30,000 cash and 500,000 common shares
- On or before February 9, 2021: $50,000 cash and 500,000 common shares

The Company is also required to incur a minimum of $1,000,000 in exploration work on the White River by February, 2022, of which $72,000 is required to be incurred by February, 2018 (incurred). As of August 31, 2018, the Company incurred qualified exploration expenditures of $581,349 on the White River Property such that all claims are in good standing.

The Vendors will retain a 3% GOR on all diamonds mined at White River, of which 1.5% can be purchased by the Company at any time for $2,000,000. The Vendors will also retain a 2% GOR on all other commodities mined at White River, of which 1% can be purchased by the Company at any time for $1,000,000.

6. SHARE CAPITAL

a) Authorized share capital

Unlimited number of common shares without par value.

b) Issued share capital

At August 31, 2018, the Company had 17,381,506 common shares issued and outstanding (August 31, 2017 – 16,781,506).

During the year ended August 31, 2018

- On February 14, 2018, the Company issued 600,000 common shares with fair value of $150,000 for exploration and evaluation assets (Note 5(c) and (d)).

(Expressed in Canadian Dollars)

6. SHARE CAPITAL (CONTINUED)

b) Issued share capital (continued)

During the year ended August 31, 2017

- The Company completed three non-brokered private placements for an aggregate of 1,585,740 non flow-through shares at a price of $0.25 per non flow-through share for aggregate gross proceeds of $396,435 of which $60,000 was received during the year ended August 31, 2016.

- The Company completed two non-brokered private placements for an aggregate of 2,185,333 flow-through shares at a price of $0.30 per non-flow through share for aggregate gross proceeds of $655,600 of which $109,267 was reclassified as a flow-through share premium liability (Note 8).

- On March 31, 2017, the Company issued 350,000 common shares with fair value of $87,500 for White River (Note 4(d)).

- On August 24, 2017, the Company issued 100,000 common shares with fair value of $25,000 for Sandspit Lake (Note 4(c)).

In connection with the issuance of shares, the Company incurred $14,224 as cash share issue costs recorded as a reduction to share capital.

c) Stock options

The Company does not have a formal stock option plan, any historical grants of stock options occurred outside of any formal plan. Stock options to purchase common shares have been granted to executives, directors, and consultants at exercise prices determined by the Board of Directors at the time such stock options were granted. The Board of Directors also set vesting provisions, and maximum option life terms.

There were no options granted, exercised or expired during the years ended August 31, 2018 and 2017.

The following summarizes information about stock options outstanding and exercisable at August 31, 2018:

Expiry date	Options outstanding	Options exercisable	Exercise price	Estimated grant date fair value	Weighted average remaining contractual life (in years)
March 20, 2020	1,050,000	1,050,000	$ 0.250	$ 63,848	1.55

7. LOSS PER SHARE

The calculation of basic and diluted loss per share for the year ended August 31, 2018 is based on the net loss attributable to common shareholders of $222,118 (August 31, 2017 – $769,486) and a weighted average number of common shares outstanding during the year ended August 31, 2018 of 17,054,931 (August 31, 2017 – 14,174,953).

(Expressed in Canadian Dollars)

8. RELATED PARTY TRANSACTIONS AND BALANCES

Key management personnel include persons having the authority and responsibility for planning, directing, and controlling the activities of the Company as a whole. Key management includes executive officers and directors.

Key management personnel compensation:

- The Company incurred $55,000 (August 31, 2017 – $40,000) in management fees during the year.

Other related party transactions:

- The Company paid $22,478 (August 31, 2017 – $57,323) in consulting fees expensed to exploration and evaluation and $12,577 (August 31, 2017 – $4,000) in rent to a consulting firm of which the Company's Chief Executive Officer is a partner. As at August 31, 2018, $2,046 (August 31, 2017 – $18,426) was owed to companies controlled by the Chief Executive Officer.

- The Company incurred accounting and administrative fees of $11,750 (August 31, 2017 – $5,288) with an accounting firm of which the Company's Chief Financial Officer is a partner, included in professional fees. As at August 31, 2018, $5,000 (August 31, 2017 – $nil) was owed to this company.

- The Company paid $8,728 (August 31, 2017 – $82,343) in consulting fees expensed to exploration and evaluation to a company controlled by its VP Exploration. As at August 31, 2018, $nil (August 31, 2017 – $3,605) was owed to this company.

- During the year ended August 31, 2018, the Company issued a non-interest-bearing promissory note with an amount of $25,000 to the Company's Chief Executive Officer. The promissory note is unsecured and payable on demand. Subsequent to August 31, 2018, the Company issued 83,334 flow-through shares at a price of $0.30 to settle the promissory note (Note 14).

9. COMMITMENTS

The Company periodically issues flow-through shares with any resulting flow-through premium recorded as a flow-through share premium liability. The liability is subsequently reduced when the required exploration expenditures are made, and accordingly, a recovery of the flow-through premium is recorded as other income.

During the year ended August 31, 2017, the Company raised $655,600 through the issuance of flow-through shares. No flow-through shares were issued during the year ended August 31, 2018. Based on Canadian tax law, the Company is required to spend the proceeds from the issuance of the flow-through shares on eligible exploration expenditures within two years from the date of issuance. If the Company is unable to meet this deadline, it will be subject to Part XII.6 taxes in accordance with the Canadian Income Tax Act.

A continuity of the flow-through share premium liability is as follows:

		August 31, 2018		August 31, 2017
Balance, beginning of the year	**$**	**1,925**	$	31,123
Liability incurred on flow-through shares issued		**-**		109,267
Settlement on expenditures made		**(1,925)**		(138,465)
Balance, end of year	**$**	**-**	$	1,925

10. SEGMENTED INFORMATION

The Company operates in one reportable segment, being the exploration and evaluation of exploration and evaluation assets. All of the Company's exploration and evaluation assets are located in Canada.

11. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its exploration and evaluation assets, acquire additional exploration interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

The Company is not subject to externally imposed capital requirements.

There were no changes in the Company's approach to capital management during the years ended August 31, 2018, and 2017.

12. FINANCIAL INSTRUMENTS

a) Fair value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's sales taxes receivable, accounts payable and accrued liabilities and loan payable approximate their carrying value, which is the amount recorded on the statement of financial position. The Company's other financial instrument, cash, under the fair value hierarchy is based on level one quoted prices in active markets for identical assets or liabilities.

12. FINANCIAL INSTRUMENTS (CONTINUED)

b) Financial risk management

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to financial instruments fails to meet its contractual obligations. The Company's exposure to credit risk includes cash and sales taxes receivable.

The Company's cash is held at a large Canadian financial institution in interest bearing accounts. The Company has no investments in asset-backed commercial paper.

The Company's sales taxes receivable consists of GST receivable from the government of Canada. The Company's maximum exposure to credit risk is the carrying value of its financial assets. Management believes that the credit risk related to its cash and sales taxes receivable is negligible.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity by maintaining adequate cash balances to meet liabilities as they become due.

At August 31, 2018, the Company had cash of $771 and accounts payable and accrued liabilities of $85,236. All accounts payable and accrued liabilities are current.

Market Risk

The significant market risks to which the Company is exposed are interest rate risk, foreign currency risk, and price risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's cash is held mainly in high yield saving accounts and term deposits and therefore there is currently minimal interest rate risk. Because of the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values as of August 31, 2018.

The Company's loan payable is not subject to interest rate risk as it is non-interest bearing.

Foreign Currency risk

The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars. As at August 31, 2018, the Company is not exposed to currency risk as all transactions and balances are denominated in Canadian dollars.

(Expressed in Canadian Dollars)

12. FINANCIAL INSTRUMENTS (CONTINUED)

b) Financial risk management (continued)

Price risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on the results of operations due to commodity price movements and volatilities. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

13. INCOME TAX

A reconciliation of income taxes at statutory rates with the reported taxes is as follows:

		2018		2017
Loss for the year	$	(222,118)	$	(769,486)
Expected income tax (recovery)		(58,000)		(200,000)
Permanent differences		(1,000)		(36,000)
Impact of flow through shares		-		170,000
Change in unrecognized deductible temporary differences		59,000		66,000
Total income tax expense (recovery)	**$**	**-**	**$**	**-**

The significant components of the Company's temporary differences, unused tax credits and unused tax losses that have not been included on the statement of financial position are as follows:

		2018	Exipry Date Range		2017	Exipry Date Range
Temporary Differences						
Exploration and evaluation assets	$	451,000	No expiry date	$	356,000	No expiry date
Share issue costs		9,000	2017 to 2020		12,000	2017 to 2020
Non-capital losses available for future periods		420,000	2018 to 2037		288,000	2017 to 2036

Tax attributes are subject to review, and potential adjustment, by tax authorities.

14. SUBSEQUENT EVENTS

- On November 28, 2018, the Company issued 83,334 flow-through shares at a price of $0.30 to settle the balance of the promissory note, which was issued to the Company's Chief Executive Officer, of $25,000.

- On November 28, 2018, The Company completed a non-brokered private placement for an aggregate of 80,015 non-flow-through shares at a price of $0.25 per non-flow-through share for aggregate gross proceeds of $20,003. This amount was received during the year ended August 31, 2018.

- The Company completed a non-brokered private placement for an aggregate of 100,001 flow-through shares at a price of $0.30 per flow through share for aggregate gross proceeds of $30,000 of which $20,000 was received during the year ended August 31, 2018.
